## 2007 to present Jeep JK Rubicon Notice

On newer Jeep JK Rubicon models equipped with factory lockers, the diff cover will need slight modification to prevent contact with the electrical connector on the locker slip collar. The photos below show the change that must be made to the cover in the fill hole area. A 4.5 inch hand grinder with a sanding pad was used for the change in the photos.

If you have any questions, please contact Solid Axle Industries 330.538.9791
